BACKGROUND Machine learning, computer vision, and robotics leader with significant experience. Develops cutting-edge technology in these fields and pushes the state-of-the-art in top conferences such as CVPR, ECCV, and NeurIPS. Experience in leading research teams to solve open-ended problems.

Technical depth in LLM post-training, generative modeling, ML-based simulation, behavior prediction, image understanding (object classification and segmentation), 3D perception (3D reconstruction, 3D object pose/shape estimation and tracking), and SLAM (mapping, localization).

EDUCATION **Georgia Institute of Technology**

Doctor of Philosophy in Computer Science (Aug. 2018 - Mar. 2022).

Ph.D. Advisors: [James Hays](#), [Frank Dellaert](#). President's Fellow, 2018-2022.

Thesis Title: *Deep Learning for Building and Validating Geometric and Semantic Maps*.

Thesis Committee: James Hays, Frank Dellaert, Simon Lucey, Zsolt Kira, Cedric Pradalier.

Stanford University

Master of Science in Computer Science, with specialization in Artificial Intelligence (Jun. 2018).

Stanford University

Bachelor of Science in Computer Science, with specialization in Artificial Intelligence (Dec. 2017).

B.S. Minor, Mathematics.

SELECTED
WORK
EXPERIENCE

Google DeepMind, Senior Research Scientist, Mountain View, California (Oct. 2024-Present)

Post-training research on multimodal LLMs for Gemini (Gemini Live and Gemini Personalization). Train, evaluate, and serve models for production. Manage and mentor student researchers and interns.

Waymo LLC, Senior Research Scientist (Mar. 2022-Oct. 2024)

Research on generative world models for autonomous driving simulation, with a focus on diffusion and multimodal LLMs. Publish papers, develop and deploy models to production, interview candidates, mentor research interns, co-organize conference workshop competitions.

Argo AI, Academic Research Associate, Cambridge, Massachusetts (Nov 2021-Mar. 2022)

Developed and prepared large-scale [Argoverse 2.0 datasets](#) and [open-source development kit](#) for public release.

Zillow Research, Research Intern, Cambridge, Massachusetts (May 2021 - November 2021).

Developed deep models and a system for home floorplan reconstruction from sparse panoramas. Work was accepted to ECCV 2022 (SALVe) and patent pending. Supervisor: Sing Bing Kang.

Argo AI, Research Intern, Atlanta, Georgia (May 2020-May 2021)

Computer vision research for self-driving technology. Work resulted in two accepted papers at NeurIPS 2021, focused on online map change detection, behavior prediction, and object detection. Supervisor: James Hays.

Intel Labs, Research Intern, Santa Clara, California (May 2019-May 2020)

Computer vision research at the Intelligent Systems Lab focused on domain generalization capabilities for semantic, panoptic, and instance segmentation [[MSeg](#), CVPR 2020]. Supervisor: Vladlen Koltun.

Argo AI, Machine Learning Research Intern, Mountain View, California (June 2018-May. 2019)

Research at the intersection of mapping, perception and machine learning for self-driving. Collaborated with many to create the [Argoverse](#) self-driving datasets [CVPR 2019] and was the main code contributor for the [argoverse-api](#) repository. Supervisors: James Hays, Simon Lucey, Deva Ramanan, Ersin Yumer.

WORK EXPERIENCE	<p>Argo AI, Machine Learning Intern, Pittsburgh, Pennsylvania (June 2017-Sept. 2017)</p> <p>Developed and benchmarked real-time machine perception algorithms in C++11/14 for autonomous vehicles. Implemented a key portion of the tracking algorithm that was immediately deployed on-vehicle. Designed and presented research proposals to company leadership for the next-generation sensor fusion system.</p>
TECHNICAL REPORTS	<p>Gemini Team. <i>Gemini 2.5: Pushing the Frontier with Advanced Reasoning, Multimodality, Long Context, and Next Generation Agentic Capabilities</i>. arXiv, 2025.</p> <p>Wenxuan Zhou, Shujian Zhang, Brice Magdalou, John Lambert, Ehsan Amid, Richard Nock, Andrew Hard. <i>Principled Foundations for Preference Optimization</i>. arXiv, 2025.</p>

WORKSHOP PUBLICATIONS	J. Lambert* , O. Sener*, and S. Savarese. <i>Deep Learning Under Privileged Information</i> . Workshop on Bayesian Deep Learning, Neural Information Processing Systems (NIPS), 2017 (Spotlight).
	A. Hoogi*, J. Lambert* , Y. Zheng, D. Comaniciu, and D. Rubin. <i>A Fully-Automated Pipeline for Detection and Segmentation of Liver Lesions and Pathological Lymph Nodes</i> . Workshop on Machine Learning in Healthcare, Neural Information Processing Systems (NIPS), 2016.
PATENTS	S. Tan, J. Lambert , H. Jeon, S. Kulshrestha, Y. Bai, J. Luo, D. Anguelov, M. Tan, M. Jiang. Driving Simulation Using Denoising Neural Networks. Patent pending. 2024.
	J. Lambert , Y. Li, L. Wixson, I. Boyadzhiev. Zillow Group. <i>Patent pending</i> . Automated Building Floor Plan Generation Using Visual Data Of Multiple Building Images. (Appl. No. 17/585,433, Pub No. US-20230138762-A1).
	J. Lambert , J. Hays., F. Ferroni, R. Kwant. Argo AI. <i>Patent pending</i> . Architecture for Map Change Detection in Autonomous Vehicles. (Appl. No. 17/169,970, Pub. No. US-20220146277-A1).
RESEARCH EXPERIENCE	Hays Lab, Research Assistant , Georgia Institute of Technology (Aug. 2018-Mar. 2022) 3D computer vision for robotics. Developed machine learning algorithms for multi-modal sensor data, with applications in 3D object detection, 3D multi-object tracking, trajectory forecasting, high-definition 3D semantic mapping, HD map change detection, and stereo vision.
	BORG Lab, Research Assistant , Georgia Institute of Technology (Oct. 2018-Mar. 2022) Structure from Motion (SfM) and 3D scene reconstruction research with Prof. Frank Dellaert.
	Stanford Vision and Learning Lab, Research Assistant , Stanford, California (May 2017-June 2018) Developed methods to utilize extra knowledge only available during training (<i>privileged information</i>) in neural networks. Showed how our model significantly increases sample efficiency during learning, resulting in higher accuracy with a large margin when the number of training examples is limited. Work focused on image classification (ImageNet) and machine translation and was accepted to CVPR 2018. Worked under the supervision of Professor Silvio Savarese.
	Stanford Vision Lab, Research Associate , Stanford, California (Jan. 2017-June 2017) Developed self-supervised representation learning methods for human action recognition from RGB video input in the laboratory of Dr. Fei-Fei Li.
	Quantitative Imaging Lab, Research Assistant , Stanford, California (June 2016-Dec. 2016) Worked with Dr. Daniel Rubin to develop algorithms for organ lesion segmentation, detection in 3-D microscopy, and automatic clinical narrative generation from images.
PHD COMMITTEES	Lena Wild, 2025, KTH Royal Institute of Technology, Stockholm, Sweden. Supervisor: Patric Jensfelt.
TEACHING EXPERIENCE	Georgia Institute of Technology Teaching Assistant for CS 6476A: Computer Vision (Graduate Level), taught by Prof. James Hays. Spring 2021. Enrollment: 180. Designed new assignments and provided a guest lecture.
	Teaching Assistant for CS 4476: Introduction to Computer Vision (Undergraduate Level), taught by Prof. Frank Dellaert. Fall 2019. Enrollment: 242. Designed new assignments and provided a guest lecture.
	Teaching Assistant for CS 6476A: Computer Vision (Graduate Level), taught by Prof. James Hays. Fall 2018. Enrollment: 202.
PROGRAMMING	Python, C/C++/CUDA, MATLAB, MPI, XHTML, CSS, Java, JavaScript.

ADDITIONAL WORK EXPERIENCE	<p>Varian Medical Systems, Software Engineering Intern, Palo Alto, California (June-Aug. 2015) Developed probabilistic graphical models (PGMs) in order to predict advantageous treatment plans for lung cancer patients. Implemented corresponding front-end and back-end infrastructure (AngularJS and Java) to deliver the machine learning models in a point-of-care Cloud application to oncologists. The models and work were showcased in early 2016 as part of the 360 Oncology™ product launch.</p> <p>EAS Advisors LLC, Summer Analyst, New York, New York (June-Aug. 2012) Created models and investor presentations for non-deal and deal roadshows at an investment advisory firm. Performed market research in natural resource industries, compiled the results, and presented findings to potential investors. Capital requirements of projects ranged from \$2M-40M USD.</p>
ACADEMIC TALKS	<p>Simulation Agents Invited Talk at Google, August 2024. Invited Talk at IROS 2023 Workshop on Traffic Agent Modeling for Autonomous Driving Simulation, October 2023.</p> <p>GTSfM: Georgia Tech Structure from Motion Talk at Skydio, January 2022 (Remote).</p> <p>Trust, but Verify: Cross-Modality Fusion for HD Map Change Detection Talk at Cruise, December 2021 (Remote). Talk at Tesla AI, December 2021 (Remote). Talk at Waymo, January 2022 (Remote).</p> <p>MSeg: A Composite Dataset for Multi-domain Semantic Segmentation Invited Speaker, ROS World 2020 Conference, <i>Recent Advances in Robotic Perception</i>, November 2020. Invited Panelist Talk, Robust Vision Challenge Workshop, ECCV 2020, October 2020. [Video]</p> <p>Argoverse: 3D Tracking and Forecasting with Rich Maps Oral Presentation. Session on Learning, Physics, Theory, & Datasets, CVPR, June 2019. Long Beach, CA. Talk at Intel Labs, June 2019, Santa Clara CA.</p> <p>Deep Learning Under Privileged Information Spotlight Presentation. Session on Machine Learning for Computer Vision, CVPR, June 2018. SLC, UT. Spotlight Presentation. Bayesian Deep Learning Workshop, NIPS, Dec. 2017. Long Beach, CA.</p>
PRESS COVERAGE	<p>Gemini The Verge. Google's Gemini is already winning the next-gen assistant wars. Jan 22, 2025. TechCrunch. Samsung Unpacked: Samsung's Galaxy S25 arrives with a better Google Gemini. Jan 22, 2025.</p> <p>Argoverse: 3D Tracking and Forecasting with Rich Maps Forbes Magazine.
